

See Things Through Their Eyes: Sensory Integration

Children with Sensory Integration dysfunction have great difficulty figuring out what is going on inside and outside their bodies, and there is no guarantee that the sensory information they are working with is accurate. For some children, sensory integration does not develop smoothly. The essential first step toward helping your child with sensory issues is to develop empathy for how they experience their world.

Tuesday, May 22, 2018

Central Library
301 W Claude St,
